

Company Profile

United Energy Services is a highly specialized provider of oilfield services, technology and equipment. The company was founded by an ambitious group of Libyan engineers, with international experience, to provide custom engineering design, oilfield services, equipment supplies and technical training for the Petroleum and Petrochemical energy sectors in Libya.

Focusing on short and long term needs of drilling and production operations in Libya, United Energy is currently in business agreement with the following high-tech oilfield equipment manufacturers and service providers:

Delta (Doha) Corporation

Delta (Doha) Corporation was originally established in Conroe, U.S.A in 1977, under the trade name of Oil Tool Specialties Company (OTS). The company was formed to manufacture API 6A Gate Valves and Wellhead Equipment, and it has held the API license since that time. In 1995 it was acquired and re-established in Doha, Qatar as a separate manufacturing facility to the US based operation.

Delta (Doha) Corporation is the only indigenous company designing and manufacturing Valves and Wellhead Equipment in the region offering a unique service to the oil companies in the Middle East and North Africa.

Delta plans for Libya include establishment of wellheads and valves service workshop to support our products and service the national companies.

Services Provided

We provide the following major disciplines: Engineering, Oilfield Services, Equipment Supplies and Technical Training.

Engineering

United Energy Services expertise encompasses areas related to drilling, production, reservoir, processing, upgrading /refining and delivery of conventional energy resources, chemicals, and petrochemicals.

We are also interesting in finding an appropriate balance between economic development and environmental considerations. This includes working with industry to ensure compliance with regulations and standards, providing advice and technical assistance to government agencies, and facilitating community involvement through consultation processes.

Oilfield Services

Oilfield services are currently in planning phase, targeting the following potential oilfield services:

- Wellheads, valves and surface equipment refurbishing
- Drilling and workover rigs services
- Directional drilling survey and steering
- Production logging
- MWD and LWD
- Fishing
- Camps construction and installation
- Oil storage tanks cleaning and inspection

Oilfield Equipment Supplies

United Energy services is authorized supplier of quality engineered products to the oil and gas sector in Libya including:

- Chemicals
- Controls & instrumentation
- Engineered products
- Drilling equipments
- Production facilities
- Pipes and related products
- Mobile oilfield camps
- Safety equipment
